### SUDDEN DEATH OF LEGISLATION

IN AID OF RAILWAYS

surprise and deep regret, that of the sudden death of Thomas Jones whe, as works manager for the Canadian Motal company, built the zmi smelter here. Mr. Jones made many friends in shiel district who will deeply despote his untimely end. Following is the Sun's account of the death of Mr. Jones together with facts pertaining to his life:

("Thomas Jones of North Seventh street died this morning at 3:30 occioes. Last night about ten o'clock he had a stroke of apoplexy and soon passed away. He was an unjusually strong man and this was the first and only serious lifeless he were had.

"He was born in Bristol, England July 24, 1840. When but 12 years of age his father fell heir so the Trewyddiffa estate, near Swansea, Wajes, where he immediately moved. Here Mr. Jones apost his bythood and you have here he mediately moved.

Neodesha.

"Mr. Jones has been engaged in aine smelting and the masufacturing of ateel all his life and was a successful business man. The last few years were spent in Alborts, his last work being the building of a large smelter for the Canadian Metal Co. at Frank Alberta. He was called from this task by the death of his daughler, Mary, and hase-been here since."

### COMPANY TO BUILD TRAIR 000,0002

Final estimates and arrangements will be made in the next week for the installation of a \$200,000 pikmt on the property of the Medilitraxy Creek Coal and Coke company, limited, by Byron E. Sharp, seeretary of the company, who will leare today, for Michel B. C. to meet J. Frank Porah, manager of the property and F. O. Greene, a coal expert from Fenney treain, who has been restained by the company to install its working plant.

This property is directly north of

### AS TO REDISTRIBUTION

AB TO REDISTRIBUTION

The subject of redistribution to increase the membership in the legislature in accordance with the increase of population since Alberta became a province is sery much in the public mind these days. Whether or not there is any good reason to expect auch a redistribution at this session is problematical but a recent news dispatch from Edmonton aunounced it to be the intention of the government to effect some such arrangement and the run of newspaper comment throughout the province would indicate that it is quite generally expected.

The talk as it affects the Pincher-Creek constituency is that it is proposed to divide this district at about jumbreds, putting all the ocal mining section of this district at about jumbreds, putting all the ocal mining section of this district into a constituency by itself. The Faxas Parea does not quite believe—yet—that such a thing is contemplated jut in the eyept it is proposed we are inclined to think there will be a pro-

but in the eyent it is proposed we are inclined to think there will be a protest from this district that will cause the members of the government to sit up and take notice

While under ordinary circumstances there would be no objection or at least no very general or serious objection, under existing conditions there is very serious and valid objection. Should such a constituency be retailed to would of course mean that in all these vectors for member of the legislature, the man elected would not represent an aggregate of \$50.000 worth of property whereas the property valuation of the district is far in excess of twenty millions. The people who own the property would have no representation at all. We do not hold that this would be so serious a matter if a straight out jabor man could be elected but that would never be the case. The labor organization of the district is in the countrol of the socialist party and that means that the people who own the property would have to be represented by a man who would be mobiling more nor less than the mouthplees of an organization whose while tenet is the very antithesis of owning property. And then there is another phase While under ordinary circum-stances there would be no objection

moutspiece of an organization whose abilet lenet is the very autitihes so of owning property.

And then there is another phase of the case that will meet with objection. Because of the fact that the creation of such a constituency would—langue always the election as member, dry specialist, all electors who do not happon to be of that persuasion would be to all intents and purposes disfranchised. It would not be as if they had a fighting chance of sometimes electing a member. It such a case the wrong would not be so great but they would never have that phance; there is no combination of circumstances that could be devised whereby they could ever elect a member.

whereby they could ever elect a monitor.

These facts have been brought to the attention of Fremier Rutherford and they realize this is a correct statement of the case. The Fash's Parm is not ready to believe they will wontonly addition to the attention of Fremier Rutherford and they realize this is a correct statement of the case. The Fash's Parm is not ready to believe the will simply be pandering to Frank Sherman as it is from him, that the proposal emanates and it-would be in the interest alone that it would be in the interest alone that it would be in the interest alone that it would be in the legislature. Of this shrine in the legislature, Of this three in no possible question as it is nifeastly known to a certainty that Mr. Shorman will be the candidate of the season of the state of the candidate of the season of t
